

Kobiton Platform Overview

Get better business outcomes with accelerated mobile releases using Kobiton's flexible mobile application platform

Mobile-first application development is essential, and delivering superior mobile experiences isn't just beneficial—it's critical. Kobiton accelerates and simplifies mobile application delivery and testing, propelling you ahead of the curve while streamlining collaboration and reducing expenditures, with flexible deployment options and AI-augmented tools. Enhance your mobile strategy and improve customer retention rates by delivering impeccable application experiences with Kobiton.

Kobiton Addresses Mobile Application Testing Challenges With Innovation

Conquer Device Fragmentation

Ensure your app performs flawlessly across a diverse landscape of devices and operating systems and guarantee a seamless user experience regardless of device specifications.

Simplified Automation

Break free from the constraints of manual testing. Kobiton empowers you to automate your testing processes efficiently, saving valuable time and resources while enhancing test coverage and accuracy.

Accelerate Market Delivery

Rapidly deploy updates and new features, leveraging our cloud-based infrastructure to streamline the testing process and shorten release cycles. Deliver high-quality apps to market faster, ensuring a competitive edge.

AI-Augmented Tools

Harness the power of artificial intelligence to optimize your testing efforts via scriptless automation, Appium script generation, Appium script self-healing, no code validations.

Kobiton Offers Flexible Deployment Options To Serve You Better

Cloud

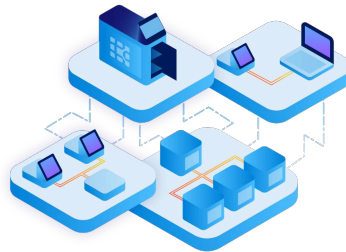

Cloud deployment eliminates the need for physical infrastructure and maintenance, and provides unmatched scalability and agility, allowing you to quickly scale your testing efforts and adapt to changing requirements without the constraints of on-premises hardware.

Hybrid

Hybrid deployment enables seamless virtualized access to your own mobile devices for testing, offering the flexibility to host these devices in a manner that best suits your needs—whether that be in a local device lab, server room, or data center.

On-Prem

On-premises deployment gives you full control over your testing infrastructure by hosting mobile devices within your own environment. Maintain data sovereignty and comply with regulatory requirements while leveraging Kobiton's powerful testing platform and ensuring maximum security, privacy, and performance.

About Kobiton

Kobiton empowers enterprises to accelerate mobile app delivery through manual, automated, and no-code testing on real devices. Kobiton's AI-augmented mobile testing platform uniquely delivers one-hour continuous testing and integration. Founded in 2016, Kobiton is venture-backed and headquartered in Atlanta.
