

Kobiton Pure Cloud Deployment

Get accessible, scalable, and flexible mobile application testing anywhere on the planet.

With Kobiton, you can effortlessly access a vast array of real devices on-demand, enabling seamless testing processes that save you time and resources. Our cloud deployment offers unmatched scalability, allowing you to scale your testing infrastructure according to your needs without any upfront investment. Plus, with integrated collaboration features, you can foster teamwork and accelerate your development lifecycle like never before.

Kobiton provides an effective solution for mobile device cloud testing, offering the tools and resources necessary to address the challenges of device fragmentation, DIY lab limitations, and emulator constraints, ensuring applications perform optimally across all devices

Kobiton Simplifies Mobile Application Testing With Flexible Cloud Deployment

Accessible

Users can access the platform from anywhere with an internet connection, enabling remote testing and collaboration across teams regardless of geographical location.

Scaleable

The cloud infrastructure allows for seamless scalability, accommodating varying testing needs and fluctuating demands without the need for additional hardware or infrastructure setup.

Efficient

With on-demand access to real devices, testers can quickly execute tests in parallel, reducing testing time and accelerating the development lifecycle.

Collaborative

The platform facilitates seamless collaboration among development, QA, and other stakeholders through features like session sharing, real-time reporting, integrated communication tools, and parallel testing.
