

# Kobiton Hybrid Deployment

Seamlessly integrate your on-prem mobile devices with a cloud testing portal for enhanced efficiency, flexibility, and control

Unlock the power of Kobiton's hybrid deployment strategy, combining the ease of a Kobiton-managed web portal with the flexibility of dedicated devices deployed within your organization's infrastructure. This strategic fusion delivers a perfect balance of direct physical control and efficient remote management capabilities.

Enjoy the benefits of full customization and control while leveraging Kobiton's intuitive web portal for seamless testing. Experience the best of both worlds with Kobiton's hybrid deployment, optimizing your testing workflow for unparalleled efficiency and effectiveness. Elevate your testing strategy with Kobiton's innovative hybrid deployment approach.

## Let Kobiton Manage the Testing Portal for Ease of Administration

### Real Devices, Reduced Overhead

Execute tests on real mobile devices you physically own to maximize ROI and manage mobile testing.

### High Scalability, Lower Overhead

Scale dynamically without the additional costs, host devices in a manner that best suits your needs—whether that be in a local device lab, server room, or data center.

### Virtualized Access, Minimal Maintenance

Enables seamless virtualized access to your own mobile devices for testing without the responsibilities and complexities of portal management, software updates, and other maintenance tasks.
