

Kobiton On-Premises Deployment

Get secure, accelerated mobile release cycles in a self-contained environment, powered by Kobiton.

Take command of your testing infrastructure with Kobiton's on-premises deployment, placing mobile devices directly within your environment. This approach guarantees maximum security, privacy, and performance, all while leveraging Kobiton's intuitive testing capabilities.

By hosting devices on-premises, you retain unparalleled control over your testing environment while harnessing Kobiton's exceptional features. Empower your testing process with the ultimate balance of control and cutting-edge technology.

Gain full control. Elevate your testing. Choose Kobiton's on-premises deployment.

Maintain Data Sovereignty and Comply With Regulatory Requirements

Bring Kobiton In-House

Users can access the platform from anywhere with an internet connection, enabling remote testing and collaboration across teams regardless of geographical location.

BYO-Security

Scale dynamically using Kobiton software with as much device security as you determine. You use your own real devices however and whenever you want them and test in parallel sessions.

Control Your Environment

Test your way, using a local device lab, data center or server room for the physical housing of your dedicated device.
