

We Run Faster with Xium

Slow tests? Get faster with Xium!

Here at Kobiton, we take pride in enabling enterprise organizations to provide the best mobile device experience across a suite of real devices and operating systems.

**Next-Generation
Mobile Experience
Platform**

**Release High-
Quality Releases
at Rapid Speed**

**Deliver Perfect
Mobile Experiences**

With our hyper-automation platform, users can test apps in a fraction of the time by leveraging intuitive AI and ML capabilities. We call part of this experience, Xium. Xium leverages the capabilities of industry-standard, Appium, but is 2x to 3x faster, which results in an excellent user experience for both app users and testing teams across the world.

Pain Point	Results In	Kobiton Solution	Positive Outcome
Appium is our selected platform, but it is really slow and our tests take a long time to run	Inefficient release cycles	Xium	A 2x-3x speed improvement over Appium means your tests run quicker so you can ship software faster
