

Create Perfect Mobile Experiences

Mobile Testing for Quality-Obsessed Customers

Why Kobiton?

Instant access to over 350 real-devices, along with your own private cloud or local lab. Run manual or automated tests, manage your own enterprise device lab or get an instant 'health-check' for your app.

Scalable. Instant. And affordable.

"I picked Kobiton over the competition because of their excellent performance, quality UI, and extremely responsive customer support. Kobiton listens to its customers and does a great job of giving us an affordable way to test on real devices without sacrificing any of the performance and features we need."

- Alexey Doroshko, Test Manager
www.replika.com

Lower App Abandonment

One-in-four apps are abandoned after first use. Ensure your app works as expected on all devices.

Deliver the perfect CX

Make sure every customer interaction is perfect on every device.

Accelerate App Delivery

Integrate real-device testing into your CI/CD processes and release at the speed of digital.

Tame Device Chaos

Manage public, private and local devices in one centralized administration console.

One comprehensive platform for all your mobile testing needs

Access over 350+ real devices in our public cloud

Test on the same devices your customers use and seamlessly access real physical devices in the cloud with full support for gestures, orientation and more. Get the most accurate results by testing mobile and Web applications on the latest devices. Go beyond emulators to get the most insight into the real user experience.

App Health Check

When it comes to mobile, you need to ensure your app runs as expected on every device. Now, with Autonomous Mobile Testing, get an instant health-check for your app by automatically running tests on real-devices and get actionable recommendations to improve the user experience across all devices.

Manage a full enterprise mobile device lab

Create the perfect test cloud with our device lab management software. Connect your local on-premise devices - and even "on-desk" devices - to your own private cloud.

Access local devices from anywhere in the world with centralized test execution, administration and logging! Supplement your devices with any of our 350+ devices to create a true hybrid cloud mobile testing platform.

With an abundance of floating hardware split amongst various business units, we needed a way to centralize devices in order to reduce bottlenecks and increase productivity. Kobiton did just that, making us more efficient and allowing us to build a better product for our users."

- Brian Baumgartner, QA Manager

Packed full of Features

One Platform

Consolidated test platform for Web, hybrid and native mobile apps.

Access over 350 Real Devices

Instant access to over 350 real-devices including the latest versions of phones and operating systems

Device Lab Management

Device Lab Management (DLM) feature allows you to easily connect internal devices, creating your own Local test cloud.

Automation

Supports parallel automation execution with mobile testing tools

Appium and Selenium

Enables mobile automation with the latest Appium and Selenium frameworks

Rich Test Logs

Centralized testing activity that is shareable across teams & locations, DLM can increase the collaboration and efficiency of your team.

About Kobiton

Kobiton is a powerful mobile device cloud that allows companies to more effectively manage the devices they own and access the real devices they want. Simple to use, easy to access from anywhere and flexible enough to scale capacity across internal or external devices, Kobiton minimizes costs while increasing productivity, helping businesses get their apps to market sooner.

The mobile device cloud platform offers centralized testing history and insights to improve collaboration across teams; access to the most in-demand mobile devices to supplement existing inventory and significant cost savings.
